

YEAR PLAN FOR THE ACADEMIC YEAR 2026-27

Class - I

MONTH	TOPIC	SUB-TOPICS	CONCEPTS
June	sticking activity	Beautiful peacock	Introducing basic colours like blue ,green,and gold found in a peacock's feathers.
<u>July</u>	sticking activity	Beautiful peacock	We make a peacock by sticking colourful ice cream sticks together to form its beautiful feathers and shapes.
August	sticking activity	Naughty catepillar	Students stick glazed paper onto the caterpillar's body to create colourful,shiny segments,developing fine motor skills and creativity.
September	sticking activity	Naughty catepillar	Students stick glazed paper onto the caterpillar's body to create colourful,shiny segments,developing fine motor skills and creativity
October	Sticker activity	Our Space world	The activity is about creating a space scene using stickers.kids pull out stickers and stick them on the page to make a fun space picture.
November	Sticker activity	Our Space world	The activity is about creating a space scene using stickers.kids pull out stickers and stick them on the page to make a fun space picture

December	Painting and cutting activity	Crafty water melon	The activity is designed to be fun and engaging while developing essential skills.
January	Painting and cutting activity	Crafty water melon	enhancing their fine motor skills, hand-eye coordination, and creativity while introducing them to the art of origami and learning about birds.
February	paste activity	Night sky	The activity encourages students to express their creativity by drawing a night sky, which includes choosing appropriate colors and designing the scene. This helps in developing their fine motor skills as they handle the sandpaper and drawing tools.
March	Cutting and paste activity	Traffic light	The activity involves identifying and matching different colors (red, yellow, and green) to their respective positions on the traffic light. Cutting out circles requires coordination between the hands and eyes.
